Backend-focused full stack software engineer with experience building and maintaining production scheduling systems and AI-enhanced web applications.

Strong background in API design, event scheduling, authentication, and backend architecture using Node.js and MongoDB. Built and deployed full-stack products including Learnify, an AI-powered eLearning platform.

EXPERIENCE

2023-2025 | Junior Backend Engineer, CalendarPass

- Designed and maintained REST APIs for a production calendar and scheduling system
- Implemented scheduling features including recurring events, validation, and conflict-aware logic
- Worked extensively with time-based data, improving correctness and maintainability of core scheduling flows
- Optimized performance-critical backend code using appropriate data structures and algorithms
- Collaborated with frontend developers to integrate scheduling features reliably in production

PROJECTS

Learnify - AI-Powered eLearning Platform

- Built and deployed a full-stack eLearning platform using React, Node.js, and MongoDB
- Implemented authentication, course management, and AI-assisted learning features
- Designed clean REST APIs and production-ready backend architecture
- Live demo: <https://learnify-77of.onrender.com>

Code Battle - Competitive Programming Trainer (Frontend)

- Designed responsive frontend UI focused on usability for competitive programming workflows
- Live demo: <https://haimfc.github.io/code-battle/>

JWatch - Responsive UX Website

- Built a static responsive website with Google Forms integration and interactive maps using Leaflet
- Live demo: <https://jonahhess.github.io/jwatch/>

EDUCATION

2019-2023 | B.Sc. Computer Science - Jerusalem College of Technology

- Data structures, algorithms, systems programming in C++ and Python

2025 | Full Stack Web Development Bootcamp - Elevation / TechTroop

- MERN stack, API-driven applications, team-based development
- Final project: Learnify

TECHNICAL SKILLS

- Node.js, Express
- REST APIs
- MongoDB, Mongoose
- SQL
- React, Mantine
- HTML, CSS
- JavaScript, Typescript, C++, Python, Go
- Git, GitHub, Render

LANGUAGES

English Native/bilingual proficiency
Hebrew Native/bilingual proficiency
Japanese Limited working proficiency

LOCATION

Jerusalem, Israel
