Full Stack Software Engineer with a Bachelor's degree in Computer Science and experience developing scalable web applications. Built and deployed full-stack applications, including Learnify, an AI-powered eLearning platform, and Meridian Theater, a real time movie reservation system.

EXPERIENCE

2023-2025 | Junior Backend Engineer, CalendarPass

- Built and maintained REST APIs for a production SaaS platform, enabling reliable delivery of new features.
- Developed backend business logic for recurring workflows, data validation, and conflict handling.
- Improved maintainability of core backend services by redesigning time-based data processing and validation flows.
- Increased scheduling efficiency at scale, improving speed by 27% and handling 38% more workload in performance testing.
- Collaborated with frontend engineers to deliver production-ready features through clear API contracts and integration workflows.
- Technologies used: **MongoDB, Express, Node.js**

PROJECTS

Learnify - AI-Powered eLearning Platform

- Built and deployed an AI-powered eLearning platform using React, Node.js, and MongoDB, enabling users to generate personalized learning experiences.
- Enabled secure user onboarding and personalized learning workflows by implementing authentication, course management, and AI-assisted learning features.
- Created a scalable backend foundation by designing REST APIs and production-ready application architecture.
- Link: <https://learnify-server-5pe2.onrender.com>
- Technologies used: **MongoDB, Express, React, Node.js**,

Meridian Theater - Real Time Reservation System

- Built a movie theater management system with real time seat reservation..
- Live demo: <https://movie-theater-mainsite.vercel.app>
- Technologies used: **FastAPI, Redis, MySQL**, and **Next.js** in Typescript

EDUCATION

2019-2023 | B.Sc. Computer Science - Jerusalem College of Technology

- Data structures, algorithms, systems programming in C++ and Python

2026 | Full Stack Web Development Bootcamp - Jumpin / inManage

- MERN stack, API-driven applications, team-based development

TECHNICAL SKILLS

Languages:

- JS/Typescript, Python, Go

Backend:

- Node.js, FastAPI,
MongoDB, MySQL

Frontend:

- React, Next.js, Tailwind

LANGUAGES

English Native/bilingual proficiency

Hebrew Native/bilingual proficiency

Japanese Limited\ working proficiency

LOCATION

Jerusalem, Israel
